

CLAIMS LISTING

1-14. (Cancelled)

15. (Currently amended) A system for use in commercialisation of intellectual property rights, the system comprising:

data storage means including data structures representing templates for documents for use in commercialization of intellectual property rights;

data processing means in communication with the data storage means, for retrieving and manipulating the data structures;

input means for inputting data and commands to the data processing means;~~and~~

output means for outputting manipulated data structures from the data processing means;

and

means for real time communication between data processing means, said means for real time communication being selected from the group consisting of video-conferencing and text-based messaging;

wherein the data processing means allows multiple users to access and amend the data structures in a single session.

16. (Original) The system of claim 15, wherein the output means comprises a remote communications link to one or more further data processing means.

17. (Original) The system of claim 15, wherein a plurality of data processing means and

input means are provided.

18. (Canceled).

19. (Currently amended) The system of claim 15, further comprising non-real time communication means selected from the group consisting of, ~~such as~~ email and ~~and~~ ~~[[or]]~~ webmail facilities.

20. (Currently amended) The system of claim 15, further comprising access regulation means selected from the group consisting of, ~~for example,~~ system privileges~~[[,]]~~ and password protection, ~~or the like, to permit authorised users different levels of access to data structures for some or all of the duration of a project.~~

21. (Original) The system of claim 15, wherein the data structures are selected from one or more of: project plans, invention disclosure forms, licence agreements, business plans, contracts for outside suppliers, and the like.

22. (Currently amended) A project management ~~tool, the tool system~~ comprising:
data storage means including data structures representing templates for documents for use in management of a project;

data processing means in communication with the data storage means, for retrieving and manipulating the data structures;

input means for inputting data and commands to the data processing means; and

output means for outputting manipulated data structures from the data processing means.

23 - 46. (Canceled).
